Class Notes

If there was no class lecture this week, write a paragraph about what you learned or questions about what you didn't understand.

Topic: fossils

Name: [redacted]

Class: Science

Period: 1

Date: [redacted]

Questions:

Notes:

What are fossils?

fossil r ← → marks from animal footprint or bod

What are fossils covered by?

layer of sedi. → on other

How are they made?

fossil made by amount of pressure compress on it

Who digs them up and by using what?

dig ↑ by scient. or archae by tools like brush & chisel

Are some extremely fragile?

some r extreme fragile coz to much pressure have hbl or crack in them

Where are some found?

some foss r found on top of mt's

Summary: Fossils of many animals footprints and bodies have been found from long times ago. They are covered by layers of sediment. Fossils are made by the total amount of pressure compressing on it. Many scientists and archaeologists have dug up fossils by brushes and other tools. Some fossils are very fragile and some are found on top of mountains.
